

# EDB Postgres Professional Services

## Postgres Services that Ensure Faster Time to Value

In today's dynamic, fast-paced IT environment, it is imperative that your DBMSs are aligned with the business and technical needs of the organization in order to support your digital transformation.

To minimize risk, you need to ensure that your Postgres environments follow best practices for such things as:

- » Systems design and implementation
- » Disaster Recovery/High Availability
- » Security controls
- » Performance tuning
- » Modern deployments options
- » Migration options

Is your Postgres environment ready to handle a digital transformation?

EDB offers comprehensive services aligned with your development or deployment stage, as well as specialized services to target specific areas of need.

If your needs don't fit neatly within an existing offering, we can work with you define custom services that satisfy your unique situation.

According to *Psychology Review*, it takes approximately 10,000 hours of deliberate practice to become an expert in almost anything. Can your business afford to wait almost 250 weeks to get results?

Let EDB provide the expert guidance and assistance to help you succeed.

---
