

# EDB Postgres Training Credits

**Easy training budget allocation with volume purchase discounts.**

Proficiency is critical to any successful Postgres environment. One of the many challenges your organization faces is trying to provide robust training and continuous education programs to grow the knowledge and skills of your teams. Figuring out how to pay for it shouldn't be one of them.

EDB Postgres Training Credits allow you to streamline the process of spending and consuming your training budget. Simply engage with finance/accounting to procure your funds ("credits"). After that, your department controls how to allocate and consume those credits most effectively.

Postgres Training Credits are offered as an annual, 12-month term purchase, making it easy to align with your budgeting process. And since discounts are built into the price of the

credits versus individual course purchases, they give you a cost-effective way to focus on learning.

The management of Postgres Training Credits is easy with the Training Credit program. Keep track of usage and receive notifications on credit balances to ensure that you always have credits available to support the training needs of your organization.

Give your teams the flexibility to get the right training at the right time throughout the year without the hassle of cumbersome procurement procedures.

---

## Highlights

### Flexible Access to Training

Your team members get to choose how and when to use Training Credits—they can select the courses and modes that work best for them.

### Streamlined Procurement

By aligning an annual training budget with the procurement process, you spend less time managing and more time learning.

### Simplified Administration

Consume and manage all training activity for individuals, a team, or an entire group through our learning management system (LMS).
