

EDB Postgres Training eSubscription

Learning made easy with flexible access to training materials

Rapid changes in the business and technology landscapes today place tremendous demands on your IT organization to keep up. One of the best ways to stay ahead of the curve is to provide a robust training and continuous education program to grow the Postgres knowledge and skills of your teams.

An EDB Postgres Training eSubscription simplifies how you and your organization purchase and consume training. This program provides you with unlimited access to the entire EDB library of on-demand eLearning content so you can learn and develop Postgres skills based upon a schedule that's convenient for YOU.

A Training eSubscription is offered as an annual subscription, giving you flexibility to access to the right training at the right time throughout the yearly term. Gone are the days of dealing

with cumbersome procurement procedures each time a new class is required.

From a value standpoint, the program provides volume-based discounts built into the price of the subscription, eliminating the desire to seek a "better deal." You and your teams are now free to focus on your business and technical needs.

By taking training at your own pace, you and your organization can save significant time, energy, and budget without requiring time away from the office.

Motivate your team to continue to learn new skills and fast-track Postgres initiatives in an efficient and effective manner with an EDB Postgres Training eSubscription.

Highlights

Cost Effective Plans

Annual subscriptions can be purchased for individuals or groups to accelerate learning based upon your specific needs.

Training for All Phases of Deployment

Whether you are building your first application on Postgres, migration from another DBMS, or looking to optimize an existing Postgres environment, EDB has the right training classes to fit your needs.

Role-Based Courses & Materials

EDB understands that different roles have different learning requirements in order to be successful.

We offer training materials specifically designed for DBAs as well as Developers, from beginners to advanced level of training.

Unlimited Access to On-Demand Library

Highly relevant eLearning classes,

workshops, online training class recordings, and webinars makeup the growing library of over 100 e-learning modules and more than 175 lab exercises.

Simplified Administration

Sign up, consume, and manage all training activity for individuals, a team, or an entire group through our centralized learning management system (LMS).

Summary of EDB Postgres Training eSubscription

Cost-Effective Plans

Budget-conscious plans are available for individuals and teams.

Unlimited Access

Access to training content from entire EDB on-demand library.

Learn at Your Own Pace

On-demand training lets you learn when its convenient for you, day or night.

Role-based Courses

Classes and content for all roles—beginner or advanced—that work with Postgres such as DBA, Developer, Architect, and more.

Wash. Rinse. Repeat

For those less-frequent tasks, take a class now and then revisit it as many times as you need for the duration of the subscription.

New Content Added Regularly

Keep up with the latest information, tips, and techniques to keep your skills up-to-date.
