

# FLEXIBILITY CONTROL VISIBILITY

## TAKE CONTROL OF YOUR POSTGRES DATABASES IN THE CLOUD

DATA SHEET

## THE EDB MANAGED DBaaS SERVICE

**Extend Postgres in the Public Cloud with Oracle-compatible Functionality**

**Focus on your business  
instead of worrying  
about infrastructure**

The EDB Managed DBaaS Service is a fully managed, “white glove” DBaaS service for Postgres delivered in the Public Cloud. Proactive 24x7x365 database and infrastructure monitoring by our certified Postgres specialists offers you the agility of operating your databases on Amazon Web Services (AWS) along with the confidence that comes from enterprise-ready EDB Postgres™.

**Experience a complete  
solution without  
compromise**

Amazon RDS and Aurora PostgreSQL offer value and simplicity, but at the cost of significantly limiting the capabilities of Postgres by removing important tuning, management, and extension features. With the EDB Managed DBaaS Service, you can experience the same ease of deployment and elasticity as with Amazon, but without the trade-offs in performance tuning, configurability, customization, and control.

**Manage and optimize  
your entire cloud  
database lifecycle**

Provision fully managed or self-service instances of Postgres with tools and expertise to streamline your migration. Achieve greater control over database usage, tuned and enhanced for a cloud infrastructure, all supported 24x7x365 by Postgres specialists.

### SCHEDULE A DEMO

# THE EDB MANAGED DBaaS SERVICE

## FLEXIBLE

Complete control over databases and cloud environment, not a "black box"

## OPTIMIZED

Proactive 24x7 monitoring and tuning of database and system resources

## SECURE

Expert advice on using AWS's secure infrastructure to protect your critical data

## AVAILABLE

Customizable replication and backup solutions to meet your availability needs

## COMPATIBLE

Extends standard Postgres with Oracle-compatible functionality

## SUPPORTING YOUR JOURNEY TO THE CLOUD

It can be difficult to move to the cloud in one single effort. Whatever stage of your journey, we provide options to meet your needs. Choose a quickly deployable managed DBaaS solution, with the following benefits.

### RESOURCE MANAGEMENT

Resource consumption managed through templates designed for your unique business rules

### EVENT & INCIDENT MANAGEMENT

Event and incident management methodology enables rapid detection, alerting, and action

### BACKUP & DISASTER RECOVERY

Customized replicas and backups are created to meet your application availability needs

### DESIGN EXPERTISE

Guidance on the optimal configurations for your environment, databases, and applications

### SOFTWARE SUBSCRIPTIONS

No hidden licensing costs or surprises as the service includes all the EDB Postgres Advanced Server software you need

### PROACTIVE MONITORING

Maximize availability with 24x7x365 proactive monitoring of your databases and environment

### PERFORMANCE TUNING

Monitoring and tuning of your databases as workloads grow and demands change over time

### AD-HOC ASSISTANCE

On demand help with standard database operations outside of managed service operations

### TRAINING

A quick start for DBAs and developers for self-service provisioning with the DBaaS platform

### WORLD-CLASS SERVICE

Our team of systems engineers provides global DBaaS services around the clock, accompanied by a technical lead who serves as your primary contact for any questions or needs

**Ask about our services to help migrate your environments and support your database operations, architecture, and infrastructure.**

EDB offers a full complement of database services for both cloud and on-premises deployments, including solution architecture services, security reviews, technical account management, support and training, and custom consulting services.
