POLL

What keeps you up at night?

1. Unplanned Postgres DB downtime or performance issues
2. The time it takes to solve Postgres problems
3. You can't find or afford expert Postgres DBAs
4. Budget is tight and you need to do more with less
5. Business-critical initiatives are not getting done

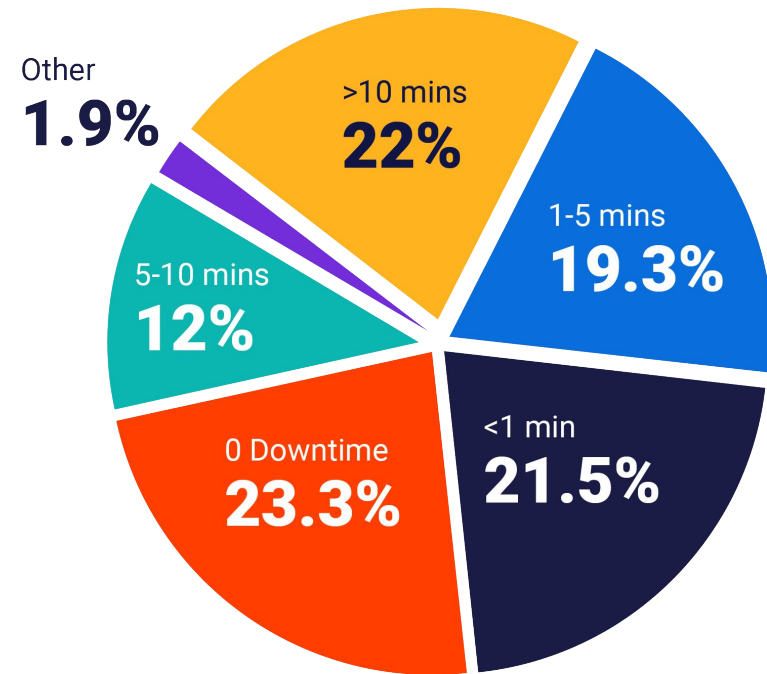

1. You are experiencing unplanned downtime or performance issues

2. Problems surface that take too long to resolve

76%

say it's unacceptable for their Postgres DB to be down more than 10 minutes!

For your current production systems, how long is it acceptable to be down after a crash/incident?

2. Postgres problems take too long to resolve

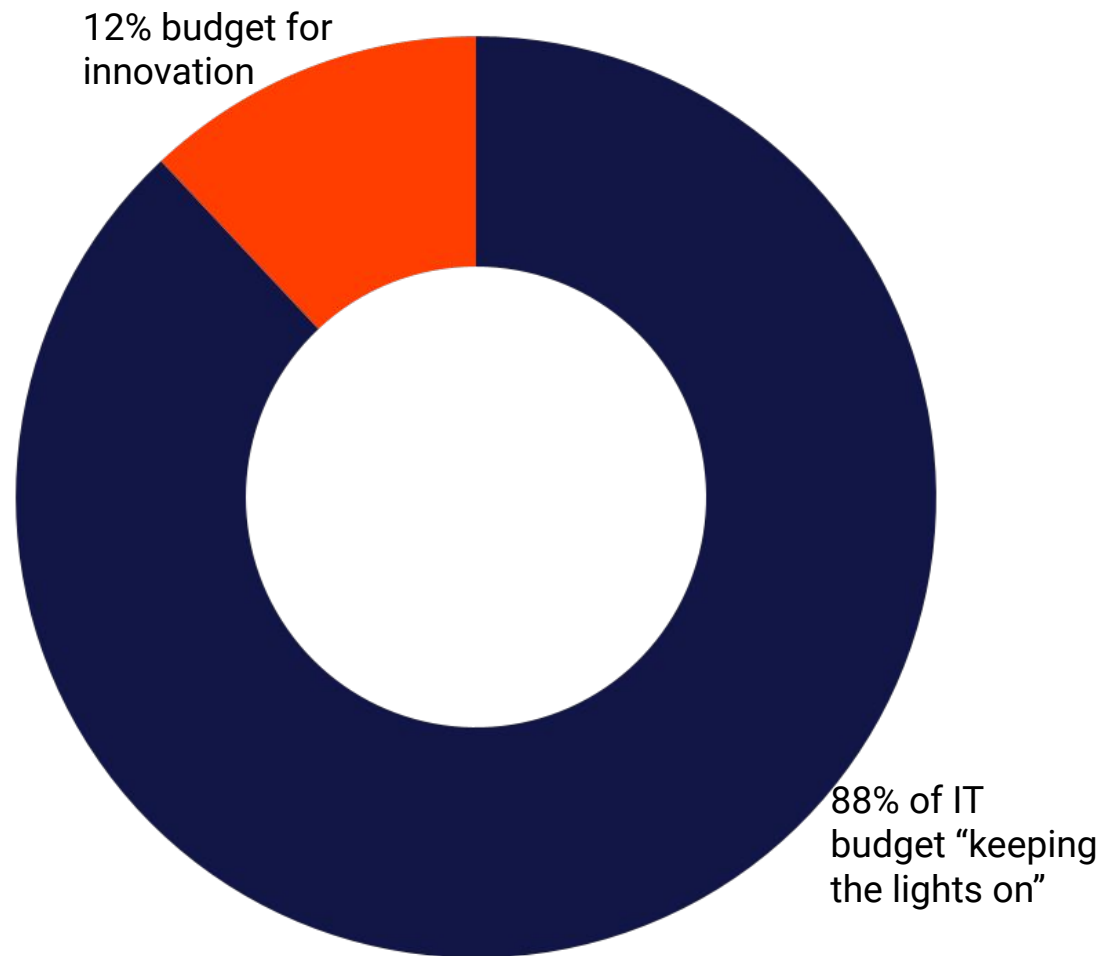

3. You can't find or afford expert Postgres DBAs

4. Your budget requires you to do more with less

5. Strategic initiatives are not getting accomplished

12%

Only 12% of the average IT budget remains for innovation

Gartner: IT Key Metrics Data 2023, Dec 2022

5. Strategic initiatives are not getting accomplished

6. You've accepted your
time-consuming, self-support model

Conclusion

There's no limit to what you can achieve with the right Postgres support

- De-risk your Postgres estate with always-on full Postgres support
- Get needed 24x7 coverage with expert DBAs
- Allocate resources to strategic initiatives
 - Implement AI technology
 - Reduce technical debt
 - Monetize data insights
 - Modernize cyber defenses
