

ON-DEMAND DATABASES IN MINUTES

ENTERPRISE POSTGRES DATABASES ON THE AWS CLOUD

EDB POSTGRES™ CLOUD DATABASE SERVICE

**A complete end-to-end
managed cloud
database service**

The EDB Postgres Cloud Database Service (CDS) is a complete end-to-end managed cloud database service that enables easy, self-service provisioning of highly available Postgres clusters or single instances on the Amazon Web Services™ (AWS) Cloud.

**Enterprise Features,
Oracle Compatible**

Streamline migrations with Oracle® compatibility features that help move existing databases to the cloud. Provision, scale and manage EDB Postgres in the cloud with database automation, including streaming replication, connection pooling, load balancing, automated failover, backups, security, and elastic storage and scale out.

**Comprehensive
Management,
Tools, and Templates**

Includes built-in capabilities for database management, cluster health monitoring, high availability, and backup and recovery. Plus, pre-defined database instance templates cover common configurations for developer, departmental, read-scale, production, and enterprise use cases.

BENEFITS

Enterprise Features

Let EDB Cloud Database service handle your load balancing, automatic failover, secure data encryption, and elastic scale out for you.

One Postgres

Simplify your infrastructure and applications by running the same Postgres everywhere - on premises and in the cloud.

Human-to-Human Support

Basic support is included free with your subscription, delivered by EnterpriseDB's team of certified Postgres experts.

Basic Technical Support is included with your subscription with a same business day response goal. Reach us Monday through Friday, 8am - 6pm ET, via email at cds-help@enterprisedb.com, or submit a ticket through your Customer Portal account.

FLEXIBLE PAY-AS-YOU-GO PRICING

Actual billing will vary based on variables such as usage duration, data volume, backup settings, and data transfers. Primary billing components include: Database instance size, AWS EC2 compute costs, vCPU utilized/hour, Storage, and Standard or Provisioned IOPS. Other factors may influence pricing and each monthly bill.
