Database Migration Assessment Service

Create a clear strategy for reducing your Oracle® costs and ensure success by decreasing execution risks with an in-depth analysis of your Oracle database and migration tactics.

Accelerate Your Escape From Vendor Lock-in

Taking a measured and planned approach to adopting a secondary database or switching databases is a wise decision. Using a trusted and experienced partner to realize your cost savings quicker is an even wiser decision. Your staff can get the job done faster and more efficiently with lower costs and fewer pitfalls when you rely on the database compatibility experts. Find out the best course to adding choice back into your database deployment decisions in days, not months.

Service Highlights

Fixed Cost
Fixed cost pricing by schema provides you a low-cost, high-impact service, eliminating any guesswork in budgeting.

Fixed Statement of Work:
•Oracle experienced engineer
•Infrastructure interview
•Diagnostic inventory
•Migration assessment report
•Report discussion
•Migration recommendations

Fixed Timeframe
Planning a migration project requires new expertise and experience that can take weeks or months to acquire. Our Oracle migration experts can help you plan and/or make a decision within days.

Eliminate Guesswork and Ensure Success

An engineer experienced with Oracle will consult with your DBA and developer staff to understand your database inventory, architecture and configuration, and then perform a systematic assessment of your Oracle database and schema usage using our powerful and fast database migration assessment tool.

A summary of assessed objects with object counts, classifications, and ratios are output into a comprehensive report that also includes a migration ratio. For all object types, incompatibility information os detailed in an accompanying log. EDB will provide accompanying recommendations specifying migration best practices within the EDB migration methodology.

Object Type	# Oracle Objects		# Assessed Objects	# EDB Postgres Advanced Server Objects			Migration Ratio %
	# Valid Objects	# Invalid Objects		# Objects that will Migrate Automatically	# Objects with Available Solutions	# Objects Requiring Analysis	
COLLECTIONS	17	0	17	17	0	0	100%
CONSTRAINTS	318	0	318	318	0	0	100%
DATABSE LINKS	8	0	8	8	0	0	100%
INDEXES	64	0	64	64	0	0	100%
PACKAGES	7	0	7	6	0	1	85%
PACKAGE BODIES	6	1	6	1	3	2	66%
PROFILES	3	0	3	0	0	3	0%
TABLES	56	0	56	55	1	0	100%
TRIGGERS	112	0	112	112	0	0	100%
TYPES	31	0	31	31	0	0	100%
VIEWS	8	0	8	8	0	0	100%
TOTAL	**630**	**1**	**630**	**620**	**4**	**6**	**99.05%**

A Picture is Worth...

Thousands of dollars or more when it comes to your infrastructure. A migration assessment report brings clarity to a task that can be difficult to measure. Our experience and 9th generation compatibility software will accurately assess your possibilities for success, the risks involved, and the cost savings you'll realize.

Migration Assessment Report

Your customized report will detail multiple key migration dimensions:

» Object types assessed

» # that will automatically migrate with the Migration Toolkit

» # that will migrate with available solutions

» # requiring further analysis

» Identified areas of incompatibility

An experienced Oracle engineer reviews each dimension, and will discuss with you migration tactics for your application, and discuss the overlap between your application and the capabilities of EDB Postgres Advanced Server.

Assistance from Assessment to Production

With 8 years in business helping organizations reduce their Oracle costs, EDB not only has the software and experience to assess your migration prospects, we can also implement your migration as well. For organizations that are time or resource constrained, our staff can fill the gap using not only our experience, but automated migration tools, saving you even more time as well as effort. In addition, our experts will review all migration issues in a sandbox environment with your staff and educate them on the implementation of your migrated data and applications, providing valuable knowledge transfer for skill building for your team.
