

EDBTM

Optimize and Accelerate Your Database Transformation with Postgres

13 December 2022

Amaralingeswara Rao Kaka

EDB Professional Services

Enterprise Strategic shift : Open source, Cloud & Data

Companies must shift to new
digital operating models
to compete and **stay relevant**

- Data is the currency
- Data ownership is an economic advantage
- Databases are a strategic asset

THE OLD WORLD IS DISAPPEARING

Legacy databases are being **replaced** by open source
And the **nucleus** is Postgres

A TIPPING POINT

Open source database licenses now outpace legacy

source: db-engines, IDC

Understand your Position on the Maturity Curve

Your PostgreSQL Journey

Value of PostgreSQL

PostgreSQL Maturity

Emerging

- Kicking the tires
- Looking at a single project
- Test/dev

Expanding

- Going to production
- Looking for better tools and automation
- Security is increasingly important

Strategic

- PostgreSQL is a “standard”
- Tier 1 apps are in production
- Scalability, HA, and automation required

EDB Services to accelerate your Postgres Journey!

Migration

Moving off Oracle quickly with minimal application changes or re-platforming existing Postgres applications to the cloud

Net New

Building Postgres deployments for your new applications

Optimization

Ensuring a robust and healthy business application with a health check of a Postgres database architecture

Custom Services

Tailor made services for your Database needs – On prem / Cloud / Extreme high availability

Packaged Services

Predefined services as a package with EDB best practices and time boxed

Strategy

- Postgres Strategy
- Enterprise Architecture
- Solution Design

Operations & Implementation

- Quick Deploy for Postgres
- Monitoring Best Practices
- Backup Best Practices

Optimization

- Architectural Health Check
- Performance Tuning

Embedded Postgres SME

Custom Services

Our team can build a customized statement of work (SOW) to help customers solve any PostgreSQL challenge.

Migrations

Services for complex migrations or customers that are short-staffed to ensure a smooth transition to a PostgreSQL-compatible environment

Upgrades

Upgrade planning and roll out, tool upgrades and integration and post upgrade optimization

Unique Services

Non-traditional services that cover an array of customer challenges
EPD (BDR) deployments
Consulting support – Long term

THANK YOU
