PostgreSQL Integration Tree

See how PostgreSQL integrates with the various elements in your tech stack.

PostgreSQL

Application Integration

- Drivers
- Development Frameworks (Python, Java, Other Programming Languages - logos)

Java, Rails, django, python, alteryx, React, re:dash, node, Vue.js, tableau PARTNER

Data Integration

- Integration Tools
- Migration Tools

MySQL, mongoDB, Oracle Golden Gate, hadoop, IBM DataStage, talend, Qlik, pentaho, EDB, HVR, Informatica, Apache Incubator, Apache Superset

Development Tools

- Graphical Development Environments
- Command Line

pgAdmin 4, EDB, DBeaver, Quest, JetBRAINS, Oracle SQL Developer, Navicat

Deployment Tools

- Database Change Deployment
- Postgres Deployment

Red Hat OpenShift Container Platform, docker, kubernetes, Progress, CHEF, Terraform, Liquibase.org, ANSIBLE, puppet, FLYWHEEL, SUSE

Security Environments

- Authorization
- Authentication
- Encryption
- Auditing

THALES Building a future we can all trust, LDAP.com Lightweight Directory Access Protocol, CYBERTEC Data Science & PostgreSQL, Active Directory, okta, tenable

High Availability and Disaster Recovery Tools

- Replication and failover
- Backup and recovery

sorint.oss, repostor, EDB, IBM Tivoli software, Pgpool-II, Microsoft Azure, aws, Google

Management Tools for Monitoring, Alerting and Tuning

- General management tools
- Speciality Postgres tools

New Relic, Prometheus, SignalFx, EDB, WAVEFRONT, Grafana, DATADOG

Infrastructure Integration

- OS and compute
- Network
- Storage

redhat LINUX, debian, Linux, Microsoft, ubuntu, Google Cloud, aws, Microsoft Azure
