Notes:

- [1] Includes all the extensions and loadable modules found at <https://www.postgresql.org/docs/current/contrib.html> based on software version
- [2] pgsnpmd and Slony-I is no longer supported by EDB beginning with PostgreSQL v14.x
- [3] Etdc is the only Distributed Consensus Store (DCS) supported by EDB and troubleshooting will include Etdc and HAProxy when used as part of the Patroni implementation

Definitions:

Guidance & Advice: EDB will provide insight and guidance for the product as it is understood per EDB's knowledge of the documented behavior and functionality of the software.

Troubleshooting: EDB will provide insight, guidance and troubleshooting for the software on approved OS platforms and versions designated at <https://www.enterprisedb.com/product-compatibility>

Break/Fix: EDB will provide insight, guidance, troubleshooting, and where possible, a technical workaround as it pertains to the software if necessary, as it relates to functionality and behavior within the official software documentation, on approved OS platforms and versions as designated at <https://www.enterprisedb.com/product-compatibility>. A workaround may consist of technical steps, a software patch or build, however EDB provides no guarantee that any code changes will persist or be maintained in the main open source project.
